

Guillermo Meléndez

Technical Artist

About me

I'm a tidy, hard-working and motivated person whose main hobbies are learning and helping others.

I've been able to learn on my own, video game frameworks as Unity and Unreal, and software as Blender and Substance Painter, improving skills as **self-taught learning** and **problem-solving**.

Also, I founded a video game's association, and with it, the annual video game congress 'Game-Gen' where I worked as director and organizer, acquiring skills of **leadership** and **time and task management**.

In recent years, I've been able to collaborate in a research team developing video games, upgrading **cooperation**, **learning** and **teamwork** skills.
